## AOAC INTERNATIONAL

### Technical Division on Reference Materials

The AOAC Technical Division on Reference Materials established a Student Award for the purpose of promoting awareness of the need for method performance evaluation during the early development of a chemist's career. The award is based upon a report that evaluates either the use of a reference material for method performance evaluation or the development of a new reference material. This Award was first offered in 2003 for the award year 2004.
