The Cannabis Analytical Science Program (CASP) has issued Calls for Methods for new standards for cannabinoid quantification, residual solvents, and Aspergillus detection. Read more »

CASP moves to next phase

Following the successful development and posting of three Standard Method Performance Requirements (SMPRs) addressing cannabinoid quantification, residual solvents, and Aspergillus detection, CASP working groups are focusing on development of three new SMPRs in 2020. Read more »

ASF Steering Committee kicks off

The newly-formed Steering Committee of the Analytical Solutions Forum held its first meeting to select chairs and determine initial priorities. Read more »

INSIDE AOAC

Meet AOAC’s new leadership

At this year’s Annual Meeting in Denver, the new Board of Directors for AOAC INTERNATIONAL took office. We interviewed AOAC INTERNATIONAL’s new President, Henry Chin, just after he was sworn in. Read more »

Thank you to our 2019 Partners

Peer-reviewed papers are essential to ensuring that AOAC INTERNATIONAL continues to be the leading authority on science to ensure food, drug, natural toxins, and environmental problems are detected accurately. We would like to thank all of our partners for the time and effort you spend developing your cutting-edge research. We know this research is key to providing innovative solutions in mass spectrometry, drug testing, natural toxins, and environmental analysis.
